

UNITED NATIONS

THIRD CONFERENCE ON THE LAW OF THE SEA

Distr. LIMITED

A/CONF.62/C.II/L.1 21 February 1974

ORIGINAL: ENGLISH

THIRD UNITED NATIONS CONFERENCE ON THE LAW OF THE SEA Committee II

COMPARATIVE TABLE OF PROPOSALS RELATED DIRECTLY TO LIVING RESOURCES

Submitted by the United States of America

Notes

- 1. This comparative table is limited to those proposals that relate directly to living resources. Its purpose is to serve as an aid and is supplementary to documents submitted to the Sea-Bed Committee and referred to the Conference by the General Assembly.
- 2. The table does not deal with the continental shelf and sea-bed resources.
- 3. Articles have been grouped into nine broad categories in an effort to make comparative study and review easier, without prejudice to the order of analysis or the unity of different proposals. The headings are found in the index on page 2.
- 4. The various proposals are presented in the English alphabetical order of the sponsoring delegations.
- 5. An index of spensors and co-sponsors of the various proposals is contained on page 3.

1. NATURE AND EXTENT OF COASTAL STATE JURISDICTION

sc.11/L.39

Afghanistan Austria Belgium Bolivia Repai and Singapore: draft articles on resource jurisdiction of coastal States beyond to territorial sea

Article I

- Coastal States shall have the right to establish, adjacent to the territorial sea, a ... zone which may not extend beyond ... nautical miles from the banelines from which the breadth o' the territorial sea is measured.
- 2. Countal States shall have, subject to the provisions of articles II and III, jurisdiction over the ... zone and the right to explore and exploit all living and non-living resources therein.

SC. II/L.40 and Corr.1-3

Algeria, Cameroon, Ghana, Ivory Coast, Kenya, Liberia, Madagaecar, Mauritius, Senegal, Sierra Leone, Somalia, Sudan, Tunisia and United Republic of Tanzania: draft articles on exclusive economic zone

Article I

All States have a right to determine the limits of their jurisdiction over the seas adjacent to their coasts beyond a territorial sea of ... miles in accordance with the criteria which take into account their own geographical, geological, biological, ecological, economic and national security factors.

Article II

In accordance with the foregoing article, all States have the right to establish an economic zone beyond the territorial sea for the benefit of their peoples and their respective economies in which they shall have sovereignty over the renuvable and non-renewable natural resources for the purpose of exploration and exploitation. Within the zone they shall have exclusive jurisdiction for the purpose of control, regulation and exploitation of both living and non-living resources of the zone and their preservation, and for the purpose of prevention and control of pollution.

The rights exercised over the economic zone shall be exclusive and no other State shall explore and exploit the resources therein without obtaining permission from the coastal State on such terms as may be laid down in conformity with the laws and regulations of the coastal State.

The coastal State shall exercise jurisdiction over its economic zone and third States or their nationals shall bear responsibility for damage resulting from their activities within the zone.

Article III

The limits of the economic zone shall be fixed in nautical miles in ascordance with criteria in each region, which take into consideration the resources of the region and the rights and interests of developing land-locked, near land-locked, shelf-locked States and States with narrow shelves and without prejutice to limits adopted by any State within the region. The economic zone shall not in any case exceed 200 nautical miles, measured from the baselines for determining territorial sea.

Article VI

The exercise of sovereignty over the resources and jurisdiction over the zone shall encompass all the economic resources of the area, living and non-livine other on the water surface or within the water column, or on the soil or subsoil of the sea-bed and ocean floor below.

Article VII

Without prejudice to the general jurisdictional competence conferred upon coastal State by article II above, the State may establish special regulation within its economic zone for:

- (a) Exclusive exploration and exploitation of renewable resources
- (b) Protection and conservation of the renewable resources:
- (c) Control, prevention and elimination of pollution of the marine environment:
 - (d) Scientific research.

SC.11/L.36

Working paper submitted by the delegations of Australia and Norway containing certain basic principles on an economic zone and on delimitation

- (n) The countal State has the right to establish, beyond its territorial sea, on incordance with these principles, an (economic zone - patrimonial sea) in which it shall have sovereign rights over the natural resources for the mimary benefit of its people and its economy.
- (b) The natural resources of the (economic zone patrimonial sea) comprise the renewable and non-renewable natural resources of the waters, the sea-bed and the subsoil thereof.
- (c) The constal State has the right to determine the outer limit of the (economic zone patrimonial sea) up to a maximum distance of 200 nautical miles from the applicable baselines for measuring the territorial sea. However, the constal State has the right to retain, where the natural prolongation of its land more extends beyond the (economic zone patrimonial sea), the sovereign rights with respect to that area of the sea-bed and the subsoil thereof which it had under international law before the entry into force of this convention: such rights to not extend beyond the cuter edge of the continental margin.

SC. II/L.25

Brazil: draft articles containing basic provisions on the question of the maximum breadth of the territorial sea and other modalities or combinations of legal regimes of coastal State sovereignty, jurisdiction or specialized competences

Article A

- Each State has the right to establish the breadth of its territwithin reasonable limits, taking into account geographical, social, econogcological and national security factors.
- 2. The breadth of the territorial sea shall in no case exceed 200 τ miles measured from the baselines determined in accordance with article present Convention.
- 3. States whose coasts do not face the open ocean shall enter into consultations with other States of the region with a view to determining agreed maximum breadth of the territorial sea appropriate to the particular characteristics of the region.

Article B

Mithin the limitations determined by article A, each State has the riestablish other modalities or combinations of legal régimes of sovereignty jurisdiction or specialized competences in the marine area adjacent to its

Coneda, India, Kenra, Hadranecar, Separal and Sri Lepta: draft arti-les on fisheries

Article 1

A countral State has a right to establish an exclusive fishery some beyond its territorial sea. The coastal State shall exercise sovereign rights for the purpose of exploration, exploitation, conservation and management of the living resources, including fisherics, in this zone, and shall adopt from time to time such measures as it may does necessary and appropriate. The living resources may be plant or animal, and may be located on the water surface, within the water column, on the sea-bed or in the subsoll thereof.

Article 2

The exclusive fishery zone may not extend beyond ... martical miles $^{\circ}$ from the benefite from which the breadth c the territorial sea is measured.

The figure for the nautical idles in this article will correspond to the figure mentioned for the concept of the exclusive economic tone.

Art'ele 8

A constal State has a special is erest in the maintenance of the productivity in the living resources of the area of the sea adjacent to the exclusive fishery tone, and may take appropriate measure to protect this interest. A constal State shall enjoy preferential rights to the resources of this area and may reserve for its nationals a portion of the allowable catch of these resources corresponding to its harvesting capacity.

8C.II/L,34

Working paper submitted by the Chinese delegation: sem area within the limits of national jurisdiction

2. Exclusive economic zone or exclusive fishery some

(1) A coastal State may reasonably define an exclusive economic some (bersimafter referred to as the economic some) beyond and edjacent to its territorial see in accordance with its geographical and geological conditions, state of its natural resources and its needs of national economic development.

The outer limit of the economic zone may not, in maximum, exceed 200 seutical miles measured from the baseline of the territorial sea.

(2) All natural resources within the economic some of a constal State, including living and non-living resources of the whole water column, sea-bed and its subsoil, are owned by the constal State.

A coastal State surrises exclusive jurisdiction over its economic some for the purpose of protecting, using, exploring and exploiting the resources as described in the preceding paragraph.

Proposals for a regime of fisheries on the high seas, subsitted by Japan

CONSERVATION OF FISHERY RESOURCES

2.1 Objective of Conservation measures

The objective of conservation measures is to achieve the maximum sustainable yields of fishery resources and thereby to secure and maintain a maximum supply of food and other marine products.

2.2 Obligations to adopt conservation securities

(1) In occess where nationals of one State are exclusively engaged in fishing a particular stock of fish, that State shall adopt, when necessary, appropriate conservation measures.

In cases where nationals of two or more States are engaged in fishing a particular stock of fish, these States shall, at the request of any of them, negotiate and conclude arrangements which will provide for appropriate conservation measures.

These conservation measures shall be consistent with the objective of conservation referred to in para. 2.1 above and shall be adopted having regard to the principles referred to in para. 2.3 below.

- (2) In onces where conservation measures have already been adopted by States with respect to a particular stock of fish which is exploited by their nationals, a new-comer State shall adopt its own conservation measures which should be as restrictive as the existing measures until new arrangements are concluded smong all the States concerned. If the existing conservation measures include a catch limitation or some other regulations not purmitting nationals of the new-comer State to engage in fishing the stock of fish concerned, the States applying the existing conservation measures shall immediately enter into negotiation with the new-comer State for the purpose of concluding new arrangements. Pending such arrangements, nationals of the new-comer State shall not engage in fishing the stock concerned.
- (5) States shall make use of the international or regional fishery organizations, as for as possible, to adopt appropriate conservation measures.
- 2.3 Basic principles relating to conservation measures
- (1) Conservation measures must be adopted on the basis of the best scientific evidence available. If the States concerned cannot reach agreement on the assessment of the conditions of the stock to which concervation measures are to be applied, they shall request an appropriate international body or other impartial third party to undertake the assessment. In order to obtain the fairest possible assessment of the stock conditions, the States concerned shall co-operate in the establishment of regional institutions for surveying and research into fishery resources.
- (2) No conservation measure shall discriminate in form or fact between fishermen of one State from those of other States.
- (3) Conservation measures shall be determined, to the extent possible, on the basis of the allowable catch estimated with respect to the individual stocks of fish. The foregoing principle however shall not preclude conservation measures from being determined on some other bases in cases where, due to lack of sufficient date, an estimate of the allowable catch is not possible with any reasonable degree of accouracy.
- (4) No State can be exempted from the obligation to adopt conservation measures on the ground that sufficient scientific findings are lacking.
- (5) The conservation measures adopted shall be designed so as to minimise interference with fishing activities relating to stocks of fish, if any, thich are not the object of such measures.
- (6) Conservation measures and the data on the basis of whick such measures are adopted shall be subject to review at appropriate intervals.

2.4 Special status of coastal States in conservation of resources

A constal State shall be recognised as having special status with respect to the conservation of fishery resources in its adjacent waters. Thus, the constal State will have the right of participating, on an equal footing, in any survey on fishery resources conducted in its adjacent waters for conservation purposes, whether or not nationals of that constal State are actually engaged in fishing the particular stocks concerned. Non-constal States conducting the survey shall, at the request of the constal State, make available to the constal State the findings of their surveys and researches concerning such stocks.

Also, except for interin measures (5.1 below), no conservation measure may be adopted with respect to any stock of fish, without the consent of the coastal State whose untionals are engaged in fishing the particular stock concerned (or the majority of the coastal States in cases where there are three or more such coastal States).

A constal State shall at the same time have the obligation to take, in co-operation with other States, necessary measures with a view to maintaining the productivity of fishery resources in its adjacent waters at a level that will enable an effective and rational utilization of such resources.

Make: Preliminary draft exticles on the delimitation of cometal State instruction in ocean space and on the plants and collections of cometal States in the area under their instruction

Chapter III: Living resources of national ocean space

Article D

- The term "conservation of living resources" means the aggregate of measures rendering possible the optimum sustainable yield from such resources.
- Conservation programms shall be formulated with a view to securing in the first place a supply of food for human consumption.

Article 82

- It shall be the responsibility in the first instance of the coastal State to
 formulate and implement appropriate and effective programmes of conservation of the
 living resources of national ocean space. Such conservation programmes shall not
 discriminate between national and foreign fishermen and shall be based on
 appropriate and reliable scientific findings.
- P. Conservation programms shall include:
- (a) graduate of biological management which may be necessary or desirable to maintain or increase the stock of living resources of national ocean space;
- (b) minimized of economic management which may be necessary or desirable to maintain fishing effort in national ocean space at levels providing maximum not neturns in relation to potential sustained catch;
- (c) measures of regulation including, inter alia, licensing, closed areas, closed seasons, limitations on size and condition of specific living resources which may be caught and limitations on type of gear designed to rander possible the successful implementation of measures of biological and economic management.
- Programmes of conservation of the living resources of national ocean space
 whill be given due publicity by the coastal State and shall be communicated to the
 international ocean space institutions.

IV. CONSERVATION PRINCIPLES

In order to assure the conservation of living marine resources, the constal State or appropriate international organization shall apply the following principles:

- A. Allowable catch and other conservation measures shall be established which are designed, on the basis of the best ovidence available, to maintain or restore the maximum sustainable yield, taking into account relevant environmental and economic fanturs.
- B. For this purpose scientific information, catch and effort statistics, and other relevant data shall be contributed and exchanged on a regular basis.
- C. Concervation measures and their implementation shall not discriminate in form or fact against any fighermon. Comeny attracts measures shall remain in force pending the attlacent, in accordance with the relevant provisions of this article, of any disagreement as to their validity.

SC.11/1.60

Zaire: draft articles on fishing

Article 1

Neighbouring developing States shall grant one another preferential treatment in their respective economic zones with regard to the exploitation of living resources. The procedure for the exercise of such rights shall be settled by arrangement between the States concerned.

The benefit of the preferential treatment provided for in the first paragraph shall, however, be reserved to nationals of those States or to enterprises under the real and effective control of those States.

The conservation and management of the resources of the entire economic zone shell lie within the competence and authority of the coastal State.

Algeria, Camercon, Chapa, Ivory Coast, Kenya, Liberia, Madagascar, Mauritius, Senggal, Sigrer Leone, Somalia, Sudan, Tunisia and United Republic of Tengania: draft articles on exclusive economic zone

Article VIII

Mationals of a developing land-locked State and other geographically disadvantaged States shall enjoy the privilege to fish in the exclusive economic zones of the adjoining neighbouring coastal States. The modalities of the enjoyment of this privilege and the area to which they relate shall be settled by agreement between the coastal State and the land-locked State concerned. The right to prescribe and enforce management measures in the area shall be with the coastal State.

The African States endorse the principle of the right of access to and from the sea by the land-locked countries, and the inclusion of such a provision in the universal treaty to be negotiated at the law of the sea conference.

Article)

Reighbouring developing States shall give reciprocal preferential treatment to one another in the exploitation of the living resources of their respective economic zones.

Article XI

No State exercising foreign domination and control over a territory shall be entitled to establish an economic zone or to enjoy any other right or privilege referred to in these articles with respect to such territory.

SC.II/L.37 and Corr.1

Argentina: draft articles

8. States in a particular region or subregion which for geographical or economic reasons do not see fit to extend their sovereign rights to an exclusive maritime area adjacent to their territorial see shall enjoy a preferential rightme for purposes of fishing in the exclusive maritime areas of other States belonging to the region or subregion, such rightme to be determined by bilateral agreements providing for a fair adjustment of their mutual interests.

The said régime shall be granted provided that the enterprises of the State which wishes to exploit the resource; in question are effectively controlled by capital and nationals of that State and that the ships which operate in the area fly the flag of that State.

- 9. The prospecting and exploration of the maritime area adjacent to the territorial sea and the exploitation of the natural resources existing therein are subject to the regulations of the coastal States concerned, which may reserve those activities to themselves or to their nationals or may allow third parties to engage in them in accordance with the provisions of their internal laws and of such international agreements as they may conclude on the matter.
- 14. Through bilateral and, where appropriate, subregional agreements, a coastal State shall facilitate for neighbouring States having no sea-coast the right of access to the sea and of transit. In the same way agreement shall be reached with States having no sea-coast on an equitable regime for the exercise in the maritime States having no sea-coast on an equitable regime for the exercise in the maritime area of fishing rights which shall be preferential in relation to third States. The said preferential rights shall be granted provided that the enterprises of the State which wishes to exploit the resources in question are effectively controlled by capital and nationals of that State and that the ships which operate in the area fly the flag of that State.

PREPERBUTIAL RIGHTS OF COASTAL STATES

3.1 Proferential rights

To the extent consistent with the objective of conservation, a constal State shall have a preferential right to ensure adequate protection to its constal fisheries conducted in its adheomy values.

(i) In the case of a developing constal State:

The coastal State is entitled annually to reserve for its flag vessels that portion of the allowable catch of a stock of fish it can harvest on the basic of the fishing capacity of its coestal fisheries. In determining the part of the allowable catch to be reserved for the developing coastal fisher. The rate of growth of the fishing capacity of that State shall be sally taken into account until it has developed that capacity to the extent of being able to fish for a major portion.

stock of fish.

We s.g. Approximately 90 per cent.

(ii) In the case of a developed scantal State:

The constal State is entitled annually to reserve for its flag vessels that portion of the allouable entoh of a stock of flab which is necessary to maintain its locally conducted small-scale constal fisheries. The interests of traditionally established fisheries of other States shall be duly taken into account in determining the catch to be reserved for such small-scale constal fisheries.

3.2 Implementation of preferential rights

- (1) Measures to implement the preferential rights shall be determined by agreement summing the constal and con-constal States occurred on the basis of the proposale make by the constal State. For the purpose of such proposals, the constal State may seek technical assistance from the Food and Agriculture Organization of the United States or such other appropriate organs.
- (2) The size of the preferential right of a coastal State shall be fixed within the limit of the allowable catch of the stock of fish subject to allocation, if the allowable catch for that stock is already estimated for conservation purposes. In cases where the settimate of the allowable catch is not available, the coastal and non-coastal States concerned shall agree on necessary measures in a manner which will best smalle the coastal State to benefit fully from its preferential right.
- (5) The regulatory measures adopted to implement the greferential right of a countal State may include eatch allocation (quota by country) and/or such other supplementary measures that will be made applicable to vessels of non-countal States engaged in finding in the adjacent waters of the countal State, including:
 - (a) the establishment of open and closed seasons during which fish may or may not be harrested,
 - (b) the closing of specific areas to fishing,

intervals as may be agreed upon by the States concerned.

- (o) the regulation of goar or equipment that may be used,
- (a) the limitation of cauch of a particular stock of fish that may be harrested.
- (4) The regulatory measures adopted shall be so designed as to minimise interference with the fishing of non-constal States directed to shocks of fish, if any, which are not covered by such measures.
- (5) Non-coastal States shall co-operate with coastal States in the exchange of available scientific information, catch and effort statistics and other relevant data.
 (6) In cases where nationals of two or more coastal States which are entitled to preferential rights are engaged in fishing a common stock of fish, no coastal States may invoke their preferential right with respect to such stock without the comment of the other coastal States concerned. In such a case, those coastal States

shall enter into regional consultations with the other States concerned with a view to implementing their preferential rights.

(7) The measures adopted under this paragraph shall be subject to review at each

SC. 11/L.28

hults: Preliminary wraft articles on the delimitation of coastal State hurisdiction in occum space and on the rights and obligations of coastal States in the area under their hurisdiction

Article 63

- In view of the vital interest of the international community in the maintenance
 of the productivity of fisheries, the coastal State has the obligation:
- (a) to comput with other States in the region and with the international ocean space institutions before undertaking or permitting activities in national ocean space which could substantially reduce the living resources of ocean space outside its jurisdiction;
- (b) to maintain the quality of the marine environment in national ocean space in a state which (i) does not adversely affect fish-spawning areas within its jurisdiction; (ii) does not produce significant deleterious effects on the living resources of ocean space outside its jurisdiction;
- (c) to co-operate with the international ocean space institutions in the formulation and implementation of programmes of confurvation of living resources of its national ocean space when the recommendations of the institutions are based on reliable and appropriate scientific findings;
- (d) to co-operate with constal States in the region in the formulation and implementation of programmes of conservation of the living resources of national ocean space when there is need for the application of regional conservation measures in the light of the existing knowledge of the fishery.

Article 88

- 1. The counted State may reserve to its nationals the exploitation of some or of all the living resources of its national ocean space.
- 2. The international ocean space institutions and the constal State or States concerned shall elaborate and implement in close consultation, if necessary through appropriate regional bodieh, non-discriminatory programmes for the exploitation of such living resources of national ocean space the migratory range of which extends into international ocean space.
- 3. Nothing in the foregoing paragraphs shall affect traditional subsistence fishing or the catching of fish for immediate human consumption by foreign (inhermon in national ocean space: such activities shall be defined and regulated in special conventions negotiated between States in the region.
- b. Notwithstanding the provisions of subparagraph 1, the constal State has an obligation to provide adjacent land-locked countries with access to the living resources of its intional ocean space on conditions similar to those applicable to the compact on the state of the second conditions.

Article 89

- The constal State has the obligation to exploit, or permit the exploitation of, the living resources of its national ocean space in accordance with appropriate and effective programmes of conservation.
- 2. Friliure to comply with the provisions of the foregoing paragraph entails legal limbility for damages and may be brought to the attention of the international occum space institutions, when such failure causes a significant reduction of fish stocks or produces nignificant deleterious effects on the living resources of ocean space outside the jurisdiction of the constal State.

Article 91

Activities of foreign fishing and fish processing vessels within national occum space as defined in article 11 shall be brought into conformity with the provisions of article 58 within five years of the entry into force of this convention.

SC.II/h.59 and Corr.l

Netherlands: proposal concerning an intermediate zone

Article 2

All exploration for, and exploitation of, the living or non-living resources of the intermediate zone shall be licensed by the coastal State, subject to the rules and regulations established by the competent international authorities [global, regional and/or subregional authorities].

Article 3

Limitation of licenses

Coastal States which have been determined to be advantaged, in accordance with the provisions of article 5, may limit the total amount of living or non-living resources which may be extracted from the intermediate zone during a specified period and reserve licenses for the option of such operators as are its own mationals and nationals of disadvantaged States, in proportions to be determined in accordance with the rules and procedures set forth in article 5.

Article 4

Limitation of disposal of a resource

The advantaged coastal State may determine that the whole or part of the living or non-living resources extracted by licensed foreign operators from the intermediate zone during a specified period shall be offered at world market prices for processing or consumption in its territory and in the territories of the disadvantaged States in proportions to be determined in accordance with the rules and procedures set forth in article 5.

Article 5

Determination of advantaged and disadvantaged States

- 1. The proportions mentioned in articles 3 and 4 shall be determined by the competent international authority in such a manner that the sum total of the "advantages" of States advantaged in the intermediate zone can be shared among the disadvantaged States pro rate of the "disadvantage" of each of them.

 The rates of (dis)advantage may be determined in two phases:
- (a) The competent international authority shall determine firstly, in accordance with the provisions of paragraph 2 of this article, rates of "(dis)advantage" in terms of surface;
- (b) The competent international authority has the power to revise from time to time the rates determined in accordance with (a), with a view to equalize possible gross disproportions among actual benefits accruing to particular States, if such disproportions result from grossly unequal distribution of resources in the respective areas of intermediate zone.
- 2. For the determination of the rates mentioned under (a) of the preceding paragraph the "advantage" of a given State is the amount of surface (square neutical miles) by which the actual intermediate zone of that State exceeds ... per cent of a theoretical surface "A" and the "disadvantage" of a given State is the amount of surface by which the actual intermediate zone of that State falls short of ... per cent of "A".
- "A" in relation to any State is the surface, expressed in square nautical miles, of a theoretical sea-area of a vidth of ... nautical miles around a theoretical circular island area equal in size to the actual total land area of that State.

Article 6

Megotiations between advantaged and disadvantaged States

1. Any disadvantaged State is entitled to enter into negotiations with any advantaged State, within groups of States to be determined by the competent international authority, in order to determine by agreement its share for the purpose of the application of article 3 or $\frac{1}{4}$.

Notification shall be made to the competent international authority of any such negotiations having been entered into and of any agreement reached. /The competent international authority shall have the power once in 20 years to revise its determination of groups of States/.

If agreement is not reached within three years after negotiations have commenced, the competent international authority shall be requested to make recommendations to the Contracting Parties concerned.

If agreement is not reached sithin one year after such recommendations are made, the determination recommended by the authority shall take effect unless either Party, within 90 days thereafter, brings the matter before the Tribunal.

Article 7

Optional transfer of part of the intermediate zone to the competent international authority

Any geographically advantaged State may decide to transfer a part of its intermediate zone equal to its "advantage" to the competent international authority to be administered by it in accordance with articles 5 and 6.
